

# **FARM MAPPING SERVICES**

- 1. Drone Scan & Drawn Map
- 2. Drawn Map from Google Earth Imagery

### FARM MAPPING WITH AGRIDRONECO

### **OPTION 1**

### Drone Scan to Drawn Farm Map

We'll come to your farm and fly the drone across it to produce a high resolution aerial image as well as scan the terrain to build a Digital Surface Map

### **OPTION 2**

### Drawn Farm Map via Google Earth

We can draw a farm map using Google Earth. This is a much more affordable option but does compromise on detail

# THE PROCESS (DRONE SCAN & DRAW MAP)

- 1. Upon arriving at your farm, Agridroneco will discuss your farm's boundaries, potential hazards, and livestock movements. They will then plan the drone flight to scan your property, which takes approximately 45 minutes per 100 hectares. The drone flight will provide an aerial image of your farm with an accuracy of 10cm.
- 2. Back at the Agridroneco office, the drone images are downloaded and stitched together to create one high-resolution aerial image of your property.
- 3. The aerial image is uploaded to Agridroneco's mapping software, where they begin constructing your farm map.
- 4. A draft of the farm map is then emailed to you for inspection. You can review and make sure everything is correct and that the layout meets your preferences. You can also print the draft and add any additional details you would like to include, such as paddock numbers/names, effluent paddocks, hazards, assembly points, speed limits, water lines, effluent lines, and electric fence switches/lines.
- 5. Once Agridroneco receives the additional details, they will be professionally incorporated into the farm map, unless you opt for separate maps for water lines, hazards, contour/elevation/aspect, etc.
- 6. The draft map can be sent back and forth until you are completely satisfied with the final farm map.

# PRICING

For our standard drone farm mapping service which gives you a:

- Both PDF farm maps (blank background and contour map)
- Digital shapefile (We can arrange to send this to your fertilizer company)

#### Drone Farm Map

We charge a \$500 starting fee plus \$4.00 per hectare of the farm.

Example: (100 hectare farm x \$4.00) = \$400 + \$500 = \$900 (excluding GST)

#### Satellite Farm Map

We charge a \$250 starting fee plus \$2.00 per hectare of the farm

Example: (100 hectare farm x \$2.00) = \$200 + \$250 = \$450 (excluding GST)

For travel the first 100km is free and then a \$1.60 will be charged from then on. We have bases in Tauranga, Matamata and Ashburton.

# WHAT YOU'LL RECEIVE

We will provide you with a PDF map via email, which you can either print yourself or have professionally printed. Additionally, we will send you the digital shapefile via email or to your fertiliser company upon request. Both Ballance and Ravensdown have online software that can receive the shapefile of your farm map, allowing you to record your fertiliser applications for each individual paddock.

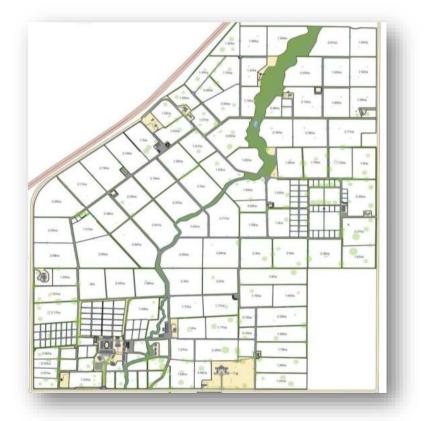

Moreover, other farming software companies such as TracMap, FarmIQ, and Halter also utilize farm map shapefiles.

Once everything has been finalised, you'll receive:

- 1. Standard farm map
- 2. Aerial image map (on request)
- 3. Shapefiles (digital files of your farm map for integration with third party software eg. Tracmap, myballance, farmiq, regional council)

#### Standard farm map

This is a map of your property with all the info but without the aerial image.

#### AERIAL ORTHOMOSAIC

This is an image of your farm made up of hundreds of smaller images taken by the drone. You can specify what info you would like displayed over the image. E.g. Paddock info, fences

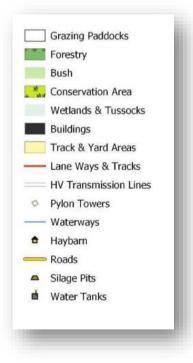

#### SHAPEFILES

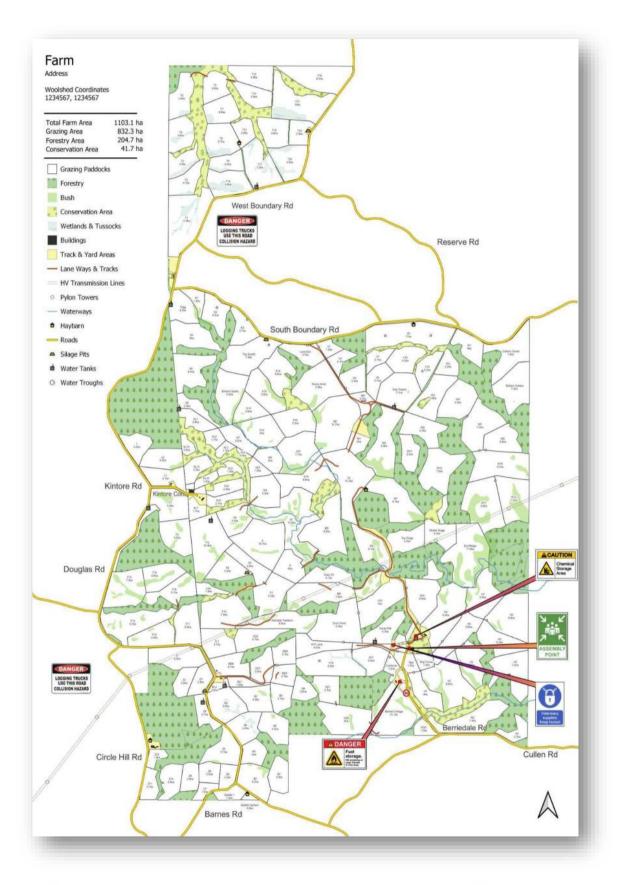

The digital shapefile can come in a range of formats. Most farming softwares accept shp.or kml. file formats. The image below is displaying a kml. file of a farm's paddocks through Google Earth.

### MAP KEY SYMBOL EXAMPLES

## HAZARD MAP OPTIONS

# **OPTIONAL FEATURE ADDITIONS**

The optional features below can be added to your map or made into a separate map for \$90 (excluding GST) each.

- Underground water lines, effluent lines, taps, hydrants
- Electric fence switches and lines
- Official LINZ title location and size
- Trees
- Elevation Map
- Contour Map
- Aspect Map

# **PRINTING & SIGNAGE**

Agridroneco provide a wide range of printing and signage options including tear off pads, laminated posters, whiteboards and plastic or aluminium signs. Prices exclude GST.

For farms 300 hectares or larger we will provide a free A3 tear off pad of your farm map.

<u>Tear Off Pad</u>

A4 (210 x 297mm) tear off pad	\$40.00
A3 (297 x 420mm) tear off pad	\$50.00

Laminated Sheet

A3 (297 x 420mm) laminated sheet	\$90.00
A2 (420 x 594mm) laminated sheet	\$110.00
A1 (594 x 841mm) laminated sheet	\$130.00

You can draw on the laminated sheets with a whiteboard pen. They are a cheaper alternative to a whiteboards which cost around a \$700 if you have the farm map printed out on them.

<u>Whiteboards</u> Talk to us for more info.

3mm thick plastic sign (you can't draw on this)(716 x 500 x 3mm)\$260.00(1000 x 729 x 3mm)\$280.00

 1.5mm thick aluminum sign (ideal for outside the shed)

 (716 x 500 x 3mm)
 \$470.00

 (1000 x 729 x 3mm)
 \$490.00

The dimensions can be changed if you would like something more specific.
